

Southwest ESD Association is active:

The first thing I'd like to do is thank the current BoD (Board of Directors) for their continued support over the years, without them we would not have an ESD association, I Thank each of you.

After about three years in inactive status the Southwest ESD Association was reactivated April 2007. Some of our goals are to growing the association and bringing to our members valuable ESD resources they can use to improve their knowledge and skills in ESD control and prevention.

What is new, first change was a completely new web site. Our web site will be more interactive providing our members with direct access to its BODs, electronic RSVP to association meetings/events, membership application, access to ESD product and/or service providers, opportunity for Product and/or Service provider advertising.

What's free, currently membership is, the BOD has authorized free membership sign up through December 2007, so please take advantage of this opportunity.

Stay tuned in the coming months as we plan and prepare meetings and presentation for you the member. Plans are to provide informative and educational meetings that we hope will meet your expectations for better understanding of ESD. As always we welcome your feedback and comments and lastly support.

Thank you
Ron Roden
President

June 14th Meeting:

ESD TLP Testing by Robert Ashton

Robert Ashton joined ON Semiconductor in 2007 in the Discrete Products Division as a Sr. Protection and Compliance Specialist after 3 years as Director of Technology at White Mountain Labs, a provider of ESD and latch-up testing of integrated circuits. Before that he was a Distinguished Member of Technical Staff at Agere Systems and its predecessors Lucent Technologies and AT&T Bell Labs in integrated circuit technology development. He has published numerous articles on ESD testing of integrated circuits, test structure use in integrated circuits and technology development. He has also presented tutorials on ESD, latch-up, and Transmission Line Pulse testing at IEEE and ESD Association conferences.

For additional information about the EOS/ESD Symposium go to www.esda.org or call ESDA at (315 339-6937).

Sponsors/Advertisements

Southwest ESD Association has provided an opportunity for product manufactures, suppliers and service providers to advertise their company and products on the Southwest ESD web site. Your support in advertising not only will bring visibility and business to your company but it also helps support the Southwest ESD Associations operations. If you would like to advertise on our web site, please take a moment and look at our new web site at www.southwestesd.com under Product and Services where you will find current advertising rates and form to submit your companies ad.

Membership

If you're not a member of the Southwest ESD Association or need more information about membership please contact Chirs Back, (ph: 623-266-0877) membership chair or any of the Board of Directors listed on the last page or visit our web sit: (www.southwestesd.com).

Board of Directors Meeting (BOD)

Board of Directors meeting are held periodically all members are welcome to attend. For specific time and place please contact Ron Roden (ph: 602-822-4383).

Association Meeting Coordinator Needed

We need to fill the association Meeting Coordinator position. If you are interested please contact any of our BODs.
